

# 525SV

Finishing or trimming metal? Deburring aluminum or steel? The light, powerful and comfortable **525SV** "pencil" style tools have speed ranges of 30,000 and 40,000 RPM, with collet capacities of 1/4" or 6mm. The slim barrel styling provides easy access for hard-to-reach areas. Optional collets are available for varied applications. The **525SV** is equipped with a shut-off valve conveniently located on its hose. The vibration level is 1,1 mm/s<sup>2</sup> and noise level under 67 dBA. These features dramatically reduce operator fatigue and risk of injury. See the **525XSV** for higher power (0.9 hp / 0.68 kW) on page 22, and the smaller 1/4" **206XSV** on page 18.
